

SUNDAY 7th MAY 2017

9:30am – 4:45pm

A day designed primarily for Speech and Language Therapists specialising in voice disorders, although other related professionals are welcome. The day will focus on voice therapy techniques including *Lax Vox*, resonant voice work and the management of psychogenic voice disorders in children.

The day will be practical and interactive, although the theoretical background and current evidence base for the techniques discussed will be included where possible.
